## 1 Getting Started

### 1-A Controls

#### Accessory information

Handset ..... one  
Handset cord ..... one  
Telephone line cord ..... one

- 1 Memory sticker
- 2 Ringer indicator
- 3 Auto dial [M1], [M2], [M3]
- 4 VOLUME [3 ], [4 ]
- 5 [PAUSE]
- 6 [\*] [TONE]
- 7 DIALING MODE selector
- 8 RINGER selector
- 9 [REDIAL]
- 10 [FLASH]
- 11 [PROGRAM]

### 1-B Connections

To single-line telephone jack

Handset cord

1 Connect the handset cord (1) to the handset and the unit. Connect the telephone line cord until it clicks into the unit and telephone line jack (2). After line connection, lift the handset to check for a dial tone.

2 Set the DIALING MODE selector to TONE. If you cannot dial, set to PULSE.

3 Set the RINGER selector to HIGH, LOW or OFF. (Example : "HIGH" is selected.) When set to OFF, the unit will not ring but the ringer indicator will still flashing.

#### Connecting a communication device

If you connect a communication device (computer, modem, fax, answering machine, etc.) to the telephone line, you can connect it through this unit using the DATA jack. After connecting the handset and telephone line cord, connect the communication device telephone line cord to the DATA jack.

Make sure the communication device is not in use before using this unit (making calls, storing phone numbers in memory etc.) or the communication device may not operate properly.

## 2 Making/Answering Calls

### 2-A Making calls

- Lift the handset and dial the phone number.
- When you finish talking, place the handset on the cradle.

**To redial the last number dialed**  
Lift the handset => Press [REDIAL]. [REDIAL] will dial the last number you called manually, not a One-Touch Dialer number (3-B).

**To adjust the receiver volume (6 levels)**  
Press [3 ] or [4 ] repeatedly while talking. After hanging up, the volume level will be saved.

### 2-B Answering calls

When a call is being received, the unit rings, the ringer indicator flashes quickly. You can answer the call by simply lifting the handset.

The ringer indicator will flash when  
j a telephone number is dialed in PULSE mode, or  
j someone picks up or hangs up another phone connected to the same phone line. This is normal.

## 3 One-Touch Dialer

### 3-B Dialing a stored number

- Lift the handset.
- Press the one-touch auto dial button [M1], [M2] or [M3]. [REDIAL] does not work for One-Touch Dialer. To dial the number again, hang up and repeat steps 1 and 2. If the telephone line cord is disconnected more than 3 days, the stored numbers may be erased. Store phone numbers again, if necessary.

## 4 Special Features

### 4-A For call waiting service users

To use call waiting, you must first subscribe to the call waiting service of your service provider/telephone company. This feature allows you to receive calls while you are already talking on the phone. If you receive a call while on the phone, you will hear a call waiting tone.

- Press [FLASH] to answer the 2nd call.
- To switch between calls, press [FLASH].

**Note:**  
Please contact your service provider/telephone company for details and availability of this service in your area.

### 4-B Temporary tone dialing (for rotary/pulse service users)

You can temporarily switch the dialing mode to tone when you need to access touch-tone services (for example, answering services, telephone banking services, etc.). Press [\*] [TONE] before entering access numbers which require tone dialing.

### 4-C Pause (for PBX/long distance service users)

A pause is sometimes required when making calls using a PBX or long distance service. Example: If you need to dial the line access number "9" when making outside calls with a PBX:

- Lift the handset to start calling.
- [9] => [PAUSE]
- Dial the phone number.

**Note:**  
A 2.1 second pause is inserted each time [PAUSE] is pressed. Repeat as needed to create longer pauses.

**If you misprogram**  
Hang up => Restart from step 1.

**To erase a stored number**  
Lift the handset => Press [PROGRAM] => => the one-touch auto dial button [M1], [M2] or [M3] of the phone number to be erased => => [PAUSE] => [PROGRAM] => Hang up.

**Memory sticker**  
Use the memory sticker as a name or phone number index for the stored numbers.

## 5 Things You Should Know

### 5-A Wall mounting

- Press the tabs in the direction of the arrows (1), then remove the wall mounting adaptor (2).

- Tuck the telephone line cord inside the wall mounting adaptor, and push it in the direction of the arrow. The word "UP WALL" should face upward.

- Drive screws (not included) into the wall using the wall template below. Connect the telephone line cord. Mount the unit and then slide it down.

### 5-B Troubleshooting

Problem	Cause/solution
The unit does not work.	Check the connections (1-B).
The call cannot be connected even if you dialed correctly.	Check whether the DIALING MODE selector setting is correct or not (1-B).
The unit does not ring.	The RINGER selector is set to OFF. Set to HIGH or LOW (1-B).
You cannot store a phone number in memory.	Confirm the handset is off the cradle. Do not enter a phone number more than 21 digits long, or the entered number and the previously stored number will be cleared.
The other party suddenly cannot hear your voice during a conversation.	[PROGRAM] was pressed during the conversation. Press [PROGRAM] again.
You cannot redial by pressing [REDIAL].	If the last number dialed was more than 31 digits long, the number will not be redialed correctly.
Liquid or other form of moisture has entered the unit.	Disconnect the telephone line cord from the unit. Leave to dry for at least 3 days. After the unit are completely dry, reconnect the telephone line cord.
